ADVANSA ThermoCool®

The Duoregulation™ fibre technology

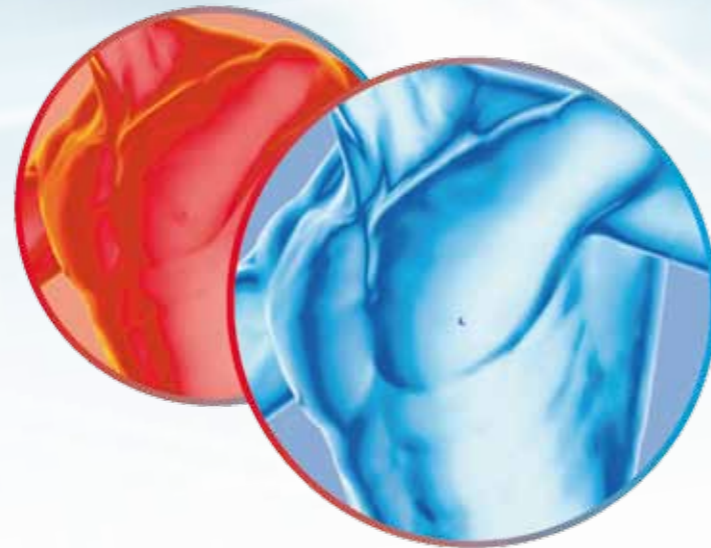

WHAT IS ^{ADVANSA} Thermo° Cool® ?

The brand which provides **Duoregulation™**

Feeling too **HOT** or too **COLD** ?

We have all experienced these two extreme and contrasting sensations, hot and cold, during the same day or a particular activity and their negative aspects on comfort and performance.

Offering energy and wellness. Duoregulation™ provides overall comfort helping you to be warm when you feel cold and cool when you feel hot.

ADVANSA Thermo°Cool® is designed to optimize the body's natural thermal capabilities through smart fibre cross-sections: Duoregulation™ adapts to the wearer's needs.

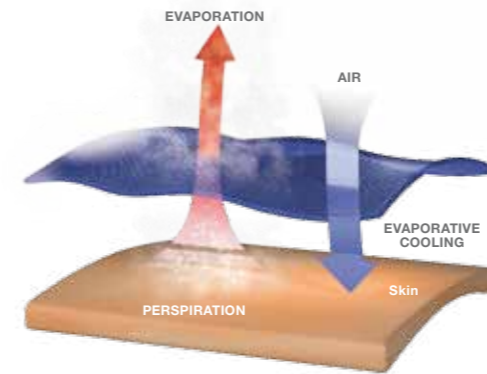

ADVANSA Thermo°Cool® provides dual functionality born from ADVANSA's experience in advanced fibre technology.

ADVANSA Thermo°Cool® is made with a unique combination of different engineered fibre cross-sections.

Made from smart fibre cross-sections
ADVANSA Thermo°Cool® provides Duoregulation™

HOW DOES ^{ADVANSA} Thermo° Cool® WORK?

The fabric interacts with the body by balancing temperature changes helping to conserve energy levels and improve wellness.

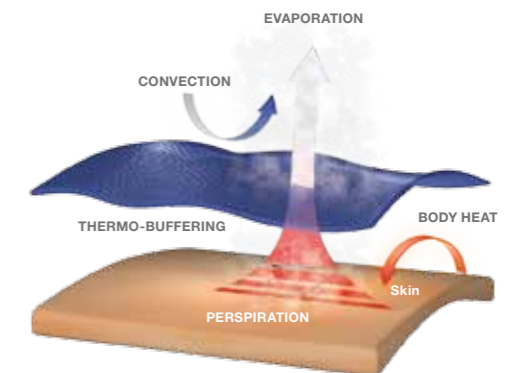

Feeling too **HOT**?

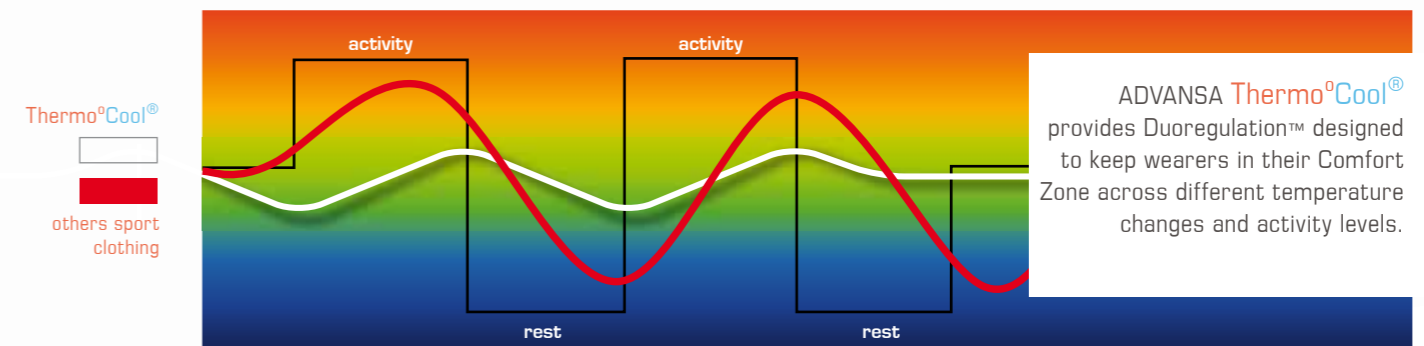

ADVANSA Thermo°Cool® evaporates moisture faster than other materials thanks to its unique fibre mix. The fibres are designed to provide added evaporative surface, outstanding moisture transport and allow enhanced air circulation focussing energy on the evaporation process.

Feeling too **COLD**?

The fibre combination in the fabric provides a light weight material with thermo-buffering properties: designed to protect the user from temperature changes. This also helps to prevent post exercise chill and still allow excess heat to dissipate into the air.

Duoregulation™ in action:

ADVANSA Thermo°Cool® helps you to be warm when you feel cold and cool when you feel hot.

Duoregulation™ means saving body energy and improving wellness in order to allow you to focus on your performance.
